

David Morales Teloxa

Frontend Developer

<https://www.linkedin.com/in/david-morales-teloxa/>

<https://github.com/Teloxa>

Computer Systems Engineer focused on front-end development with Vue3.js, expanding toward full-stack with hands-on backend experience. My previous experience in customer service and logistics in Mexico and the United States has allowed me to develop the ability to adapt quickly, work effectively as part of a team, and communicate effectively. I complement my skills with Node.js and relational and non-relational databases, and I excel at applying critical thinking to solve problems with precision and learning new environments independently.

PROFESSIONAL EXPERIENCE

Software developer | Clever Cloud

(Remote · Jan 2026 – Present)

- Developed web and mobile features using Ionic, Vue.js, and TypeScript, integrating APIs and business logic into scalable applications.
- Work on agile teams using SCRUM: planning, tracking, and retrospectives for weekly sprints.
- Managed the full release cycle using Git and Bitbucket: feature branches, pull requests, and code reviews.
- Diagnosed and resolved production issues, maintaining the stability and operational continuity of the applications.

Software developer | Centro Virtual de Negocios

(Remote · Jan 2026 – Mar 2026)

- Designed and implemented custom interfaces, tailoring the visual structure, user experience, and application components to match client-defined specifications.
- Executed iterative adjustments and enhancements based on client feedback, ensuring the delivery of a final product aligned with their needs and quality standards.

PROJECTS

Development of inventory systems | Full-Stack

(June 2026)

- Implemented a modular architecture for REST API consumption using Axios, decoupling business logic from the user interface to improve maintainability, scalability, and code reusability.
- Designed responsive interfaces tailored for mobile and desktop devices using Tailwind CSS, ensuring a consistent user experience across multiple resolutions.
- Created reusable components and intuitive navigation flows, incorporating animations and transitions that enhance user interaction and experience.

EDUCATION

B. S. in Computer Systems Engineering

(Jan 2022 – Dec 2026 Expected)

Universidad de Guanajuato Campus Irapuato – Salamanca

Associates degree in Programming

(Aug 2018 – June 2021)

Centro de Bachillerato Tecnológico Industrial y de Servicios No. 60

TECHNICAL SKILLS

Languages: JavaScript, Java , TypeScript, Python.

Frameworks: Vue.js, React, Next.js, Node.js

Stack & Tools: MySQL, PostgreSQL, Firebase, Supabase, Git, GitHub, Docker, AWS.

CERTIFICATIONS & LANGUAGES

Introduction to AI Development: Git, ChatGPT, Claude.ai

Mar. 2026

English Program: Universidad de Guanajuato, Level B2

Dec. 2025
